FESPA 2019: Welte in hall B4 – stand L18

„Our Finishing-Solutions for your Large-Format-Workflow“

Freiburg, April 2019

Welte GmbH will exhibit at FESPA 2019 in Hall B4 – booth L 18 with products for finishing and further processing for the Large Format Printing industry.

The main focus for the FESPA show is coating and laminating:

Bürkle LFC Liquid Coating Line 1300/1600/2100

With the Bürkle LFC Liquid Coating System primers, top coatings and colored coatings can be applied to a wide variety of substrates quickly and cost-efficiently. Applications in the fields of the sign industry, interior design and industry production are offering additional possibilities and are expanding the range of applications of digital large-format printing. The Roll-to-Roll-option, the Wandres brush cleaning system and a feeder system for boards and plates are presented as extensions for the Bürkle LFC Coating System. On FESPA Welte shows the automatic feeder in combination with the Wandres brush cleaning system.

AquaSeal by Welte

The AquaSeal 3300 was developed for the protective coating of truck tarpaulins, Self adhesive foils and PVC banners with water-based coatings. With a working width of up to 3300 mm, an IR drying unit and robust winding and unwinding units the system is ready for professional heavy duty.

SEAL Laminatoren

The top model from the range of SEAL laminators is the SEAL 62 Pro S. The SEAL laminators are convincing with their simple operation, process reliability and extreme longevity.

Contact persons for the press on the Welte booth are Frank Welte, Norbert Burgert and Frank Rohrer. For appointments please contact: Phone +49 761 696 860 or eMail info@weltenet.de
